

MARABEL

GENERAL

- MARABEL is an early variety (90 – 100 growing days)
- It's an easy growing variety, which achieves under hot and dry conditions high and stable yields
- Take the seed out of the bag directly after arrival for better seed conditions
- Soil preparation; aim should be a loose topsoil
- Planting distance: ■ Planting depth is normal

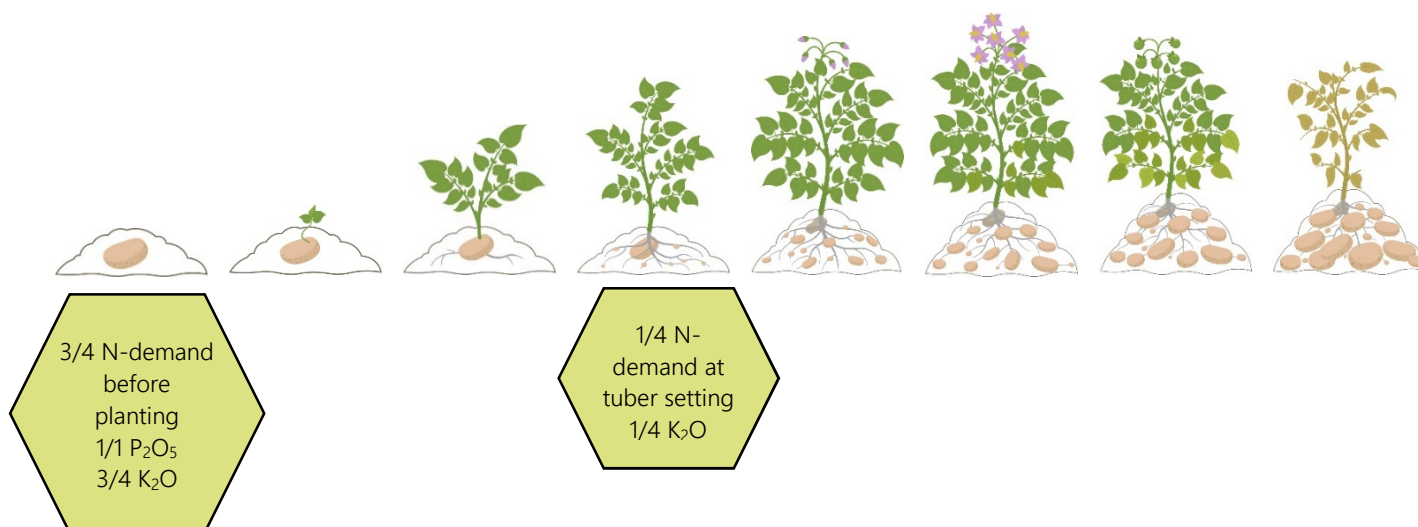

Aim of size	Seed size	Row distance	
		75 cm	90 cm
40/60	28/35	18-19 cm	15-16 cm
	35/55	30-32 cm	24-25 cm
60+	28/35	20-22 cm	17-18 cm
	35/55	34-36 cm	27-29 cm

- P_2O_5 90 kg/ha
- MgO 70 kg/ha
- Seed dressing: treatment is recommended; preferably furrow dressing (Azoxytrobine as a soil treatment shows good results against many fungi)

ATTENTION POINTS

- Soils with high pressure for internal rust spot should be avoided
- Should be grown on better soils with uniform water and nutrient supply
- Avoid crop rotations under 4 years!
- MARABEL is slightly sensitive for post emergence application of Metribuzin, this should be avoided - (if you must need it, split it in 2 treatments 200g and 4-5 days later again 200g)
- N 140-160 kg/ha incl. N_{min} (dependent from soil type/ location/ Packing size)) – with irrigation split of the amounts 3/4:1/4
- K_2O 280 - 300 kg/ha (as K_2SO_4 ; up to 100 kg/ha - applied as potassium chloride) – with irrigation split of the amounts 3/4:1/4

All particulars are based on official variety trials and/or our own experience. However, as potatoes are natural products we cannot undertake any liability for these details.
